The Congress

ISOCARP welcomes Congress contributions by city and regional planners and interested individuals from related disciplines from all over the world. For the 2019 congress the following submissions are possible:

1. **Submission of a paper:**
   Academic contribution consisting of a paper and a Presentation. The paper will be included in the Congress Proceedings with an ISBN number (only for authors attending the conference). Each year ISOCARP submits the Proceedings to Conference Proceedings Citation Index – Web of Science.

2. **Submission of a case study, project, practical experience, or research:**
   Professional contribution to the planning practice consisting of a presentation on a specific project, proposal, plan, design, existing or work-in-progress development etc. Submitting a paper is optional, but highly recommended. Abstract (and paper if submitted) will be included in the Congress Proceedings.

3. **Submission of a session proposal:**
   Session proposers have to identify and coordinate all the session speakers. Sessions will be 90 minutes long. Discussion or interaction with the audience is highly encouraged. Formats other than the traditional presentations are encouraged, including: point/counterpoint, panel discussions, single speaker, moderated debate, interactive workshops, round tables, etc. All speakers need to register for the congress. An abstract of the session proposal is mandatory and will be included in the Congress Proceedings.

4. **Panel discussion**
   This is a short 30-minute round-table or moderated panel discussion within a Track. The proposer needs to identify the topic, prepare in advance questions and themes for discussion and be ready to moderate the panel at the Congress. Panel members can be drawn from the delegates already attending the Congress, and support will be offered by the congress team. Discussion or interaction with the audience is highly encouraged.

An abstract of the session proposal, including an outline of speakers, is mandatory and will be included in the Congress Proceedings.

For all four options authors first submit an abstract to the online platform. Instructions for writing and submitting an abstract are given in Instructions for abstracts.

When the Congress Team advises authors that their proposed contribution has been accepted for the Congress, papers, case studies, projects, detailed session descriptions should be submitted to the online platform by the respective deadline. All papers submitted and presented at the Congress are published online in the Congress Proceedings. Each year ISOCARP strives to have the Congress Proceedings indexed in Conference Proceedings Citation Index within Web of Science. In addition, presentation slides are made available on the ISOCARP website after the Congress. Authors are encouraged to publish their paper elsewhere, acknowledging that it was first presented at the ISOCARP Congress. After the congress selected contributions will be published electronically with ISBN number, together with the congress summary.

Invited speakers (generally presenting to plenary sessions or special events) are encouraged to follow the same process, and in any event to submit a paper, a summary and/or their presentation slides for inclusion in the Congress Proceedings.
Call for Contributions

The General Rapporteur issues the Call for Papers. This outlines the theme and topics for the Congress, and any special events and subjects for which papers and proposals are invited. The Call for Contributions is published on the ISOCARP website and is widely distributed.

ISOCARP online platform

Online submission
ISOCARP provides intending authors and presenters at the ISOCARP Congress with an online platform for the submission of abstracts and extensive contributions (in English). Authors will be guided through a number of steps in submitting their abstract. After finalisation of the Congress program, the website becomes a public platform giving delegates and others information on who is speaking and presenting at the Congress, and access to the contributions to be delivered at the Congress.

Instructions for abstracts

In submitting an abstract for the ISOCARP Congress, authors provide the following:

- Name, position, institutional affiliation (if any) and contact details for each author
- If more than one author, name of corresponding author (all emails will be addressed to this author)
- The title of the proposed paper
- The topic to which the contribution most closely relates
- A brief synopsis of the contribution for printing in the Congress Program (not more than 50 words)
- Agreement with the terms of these Guidelines for authors and invited speakers
- Agreement for author information to be published by ISOCARP, and grant of a non-exclusive licence to ISOCARP to make use of

and publish the subsequent Congress paper and presentation.
- The abstract itself is in English. It is text only, with no images, figures or tables. It is between 300 and 600 words (up to a limit of 4000 characters with spaces).

ISOCARP welcomes contributions from all circumstances and traditions, and from citizens, students, practitioners and planning officials as well as researchers and academics. However, to enable the Congress Team to make a reasonable assessment of the appropriateness of the proposed paper for the specific Congress, the paper/case study abstract should include the following components:

- A brief description of the “problem”: the project, proposition or research question that is the subject of the paper; or a brief description of the place, issue or planning approach addressed in the paper.
- Background – for example, basis in theory, policy framework, governance context, economic conditions – for the project or planning work.
- Reference to two or more scholarly or official works, locating the project in a specific discipline, intellectual tradition, and/or planning context.
- A brief indication of the methods used in carrying out the work described in the paper.
- An outline of the principal results, outcomes, findings and lessons.
- Finally, a note about the extent to which the work is (or is not) generally applicable.

Allocation to tracks

The Congress Team selects the most appropriate contributions for the Congress, advises authors of acceptance or otherwise, and in some cases gives advice for the completion of the contribution. Accepted contributions will be presented at the Congress. Contributions will be published in the online Congress Proceedings. Only contributions
from registered authors will be published. While the author's views regarding the appropriate track, topic or session for the paper are taken into account, allocation to a session is governed by the overall mix of papers, and may change when the schedule is finalised immediately before the Congress to achieve the best balance of topics and sessions.

Authors of papers presented at the Congress are encouraged to subsequently submit their paper for publication in scholarly journals, magazines, reports and other publications, provided that this is accompanied by a statement to the effect that the paper was first delivered to the 55th ISOCARP Congress in Jakarta, Indonesia, in 2019.

**Style and format for papers**

Authors are requested to adhere strictly to the Congress style and format for their paper, to facilitate its inclusion in the Congress Proceedings.

The language is English. Before being submitted, Congress papers should be edited to achieve a language quality consistent with scholarly standards. Papers not meeting this standard will not be accepted or will be returned for revision and resubmission.

Images, figures and tables, and their captions with details of the sources of data and figures, should all be embedded in the document. The style for citing references is the Harvard style (author and date in the citation; author, date, title of chapter/article, title of book/journal, publisher/volume and page numbers in the alphabetical list of references at the end of the paper). Notes should be avoided, but if necessary should be in the form of numbered endnotes listed at the end of the paper; footnotes should not be used.

Most Congress papers are around ten pages in length (when formatted in accordance with the instructions below). Length should not exceed twelve pages, and size should not exceed 2 MB. The Congress Proceedings will be published immediately prior to the Congress. ISOCARP editors may make minor modifications, and if necessary may reduce the size and/or number of images, figures and tables to meet size constraints.

To maintain consistency in the Congress Proceedings, papers should be submitted using the prepared template file which include settles paragraphs styles. Please see the instructions for the template layout for all the necessary information. The preferred file type is PDF.

**Dates and deadlines**

Reviewing, programming and publishing well over 100 Congress papers requires a great deal of team work and cooperation, leading to a rich and enjoyable Congress for authors and delegates alike. To achieve this outcome, the deadlines indicated on the congress website have to be followed.

ISOCARP Congresses strive to achieve a good balance between the presentation of formal, informative contributions and lively discussion and debate among those attending the sessions. Depending on the session, keynote and invited
Finally, what it’s all about: Presenting at the Congress

Speakers may be asked to speak for 20, 30 or 40 minutes, allowing time for questions and discussion. In panels and forums, speakers may be asked to make brief initial contributions of 5-8 minutes. In the tracks, authors are asked to limit their presentation to 10 minutes. In all cases, the Congress Team will liaise with speakers and discuss with them the format of their session.

Authors are welcome to speak with or without notes, and with or without presentation slides (Powerpoint, Prezi etc). Where slides are used, their primary purpose should be to supplement the spoken word with maps, images, figures and tables, and they should be few in number (10 to 20, even less). If slides contain text, the content should be limited to key words and headings, and should be visible from the back of the room. When using slides, authors should be aware of the tendency for their delivery to be “driven by Powerpoint” (rather than the other way around), and specifically should avoid reading out the text on the screen. Dynamic and engaging presentations are encouraged, these should be short interventions to present the results of work and inspire discussion afterwards.

For session proposals formats other than the traditional presentations are encouraged, including: point/counterpoint, panel discussions, single speaker, moderated debate, interactive workshops, etc.

Presenting at an ISOCARP Congress is a highly enjoyable and rewarding experience. Fellow authors come from all parts of the world to share their knowledge and experience, and to learn from colleagues in situations both similar to and very different from their own. The delegates are there to gain insights into cutting edge planning around the world, and to make and renew friendships with planners in other cities, countries and cultures. An ISOCARP Congress offers a unique combination of scientific content, diverse perspectives, and collegiality. The most rewarding way to be part of this is to give a paper in one of the paper sessions. We hope that these Guidelines for authors and invited speakers help to make this opportunity a reality, and that we can welcome planners – young and old, north and south, east and west, practical and theoretical, technical and artistic, famous and unknown, generalist and specialist, teacher and learner!

Jeremy Dawkins, Vice President Congresses, December 2012
